A Behavioral Intervention Team (BIT) is a cross-divisional group that helps detect early indicators of potential disruptive conduct, self-harm, and violence to others. The team uses an established protocol to support students, employees, and the SHSU community. When BIT receives a report of problematic or concerning behavior, the team determines the best way to support, intervene, and respond. The team then connects students to the appropriate resources and if necessary, assists with reintegration to the campus community.
