# What is Bearkat EduNav?

The Bearkat EduNav (BEN), is a semester-by-semester planner that generates the optimal path to degree completion. The BEN is personalized to each SHSU student – no two plans are alike. Students can drag and drop courses while also editing semesters. The BEN offers clear notifications if the student defers from their recommended optimal path.

How does Bearkat EduNav look?

Where can the student find it?

The student must log into MySam and first select the Registration tab, then the Add/Drop button under the Bearkat Registration Dashboard. *Please direct students to speak to their advisors if they have any question or wish to review, edit or adjust their planners.*
